

The Gunslinger Class: Valda's Spire of Secrets

Gunslinger

Risk is in a Gunslinger's blood. They are bold renegades, bucking tradition and forging a new path with dangerous and inelegant firearms. Gunslingers are infamous for surviving by their wits and relying on split-second timing and a considerable amount of luck to survive.

Guts and Gunpowder

Black powder isn't for the faint of heart. Its thunderous applause is volatile and imprecise—a barely controlled explosion directed at an enemy. Only the truly fearless seek to master it. But Gunslingers have nerves of steel, hurling death from their guns in a roaring cacophony. Adapted for shootouts, gunslingers are mobile and daring, knowing that life or death hangs on snap decision-making and one's own mettle.

Dangerous Outsiders

A Gunslinger’s explosive lifestyle lends well to wandering and adventuring. Gunslingers often shoot first and ask questions later, an attitude which earns them few friends and bountiful enemies. In their travels, most gunslingers are secretive and take great lengths to go unnoticed, lest they be spotted by old foes with scores to settle.

Core Gunslinger Traits

Primary Ability	Dexterity
Hit Point Die	D8 per Gunslinger level
Saving Throw Proficiencies	Dexterity and Charisma
Skill Proficiencies	Choose 2: Acrobatics , Animal Handling , Athletics , Deception , Insight , Intimidation , Perception , Persuasion , Sleight of Hand , and Stealth
Weapon Proficiencies	Simple weapons and Martial Ranged weapons
Armor Training	Light armor
Starting Equipment	Choose A or B: (A) Leather Armor , 2 Daggers , Revolver , 50 Bullets , Explorer's Pack , and 11 GP; or (B) 175 GP

Becoming a Gunslinger...

As a Level 1 Character

- Gain all of the traits in the [Core Gunslinger Traits](#) table.
- Gain the Gunslinger’s level 1 features, which are listed in the [Gunslinger Features](#) table.

As a Multiclass Character

- Gain the following traits from the [Core Gunslinger Traits](#) table: Hit Point Die, and proficiency with Martial Ranged weapons.
- Gain the Gunslinger’s level 1 features, which are listed in the [Gunslinger Features](#) table.

Gunslinger Class Features

As a Gunslinger, you gain the following class features when you reach the specified Gunslinger levels. These features are listed in the Gunslinger Features table.

Gunslinger Features

Level	Proficiency Bonus	Features	Risk Dice	Weapon Mastery
1	+2	Fighting Style , Quick Draw , Weapon Mastery	—	2
2	+2	Critical Shot , Risk	4d8	2
3	+2	Gunslinger Subclass	4d8	2
4	+2	Ability Score Improvement	4d8	3
5	+3	Extra Attack , Gut Shot	4d8	3
6	+3	Subclass feature	5d8	3
7	+3	Evasion	5d8	3
8	+3	Ability Score Improvement	5d8	3
9	+4	Critical Shot	5d8	3
10	+4	Subclass feature	5d10	4

Level	Proficiency Bonus	Features	Risk Dice	Weapon Mastery
11	+4	Overkill	5d10	4
12	+4	Ability Score Improvement	5d10	4
13	+5	Cheat Death	5d10	4
14	+5	Subclass feature	6d10	4
15	+5	Dire Gambit	6d10	4
16	+5	Ability Score Improvement	6d10	4
17	+6	Critical Shot	6d10	4
18	+6	Deft Maneuver	6d12	4
19	+6	Epic Boon	6d12	4
20	+6	Headshot	6d12	4

Level 1: Fighting Style

You gain a [Fighting Style feat](#) of your choice. If you choose a feat, such as [Great Weapon Fighting](#), that requires you to hold a Melee weapon in one or two hands, you can use that feat with Ranged weapons.

Whenever you gain a Gunslinger level, you can replace the feat you chose with a different Fighting Style feat.

Level 1: Quick Draw

You're adept at drawing and firing before others have time to react, granting you the following benefits.

Initiative. You have **Advantage** on Initiative rolls.

Double Draw. You can draw or stow two weapons that lack the **Two-Handed** property when you would normally be able to draw or stow only one.

Level 1: Weapon Mastery

Your training with weapons allows you to use the mastery properties of two kinds of Simple or Martial Ranged weapons of your choice. Whenever you finish a Long Rest, you can practice weapon drills and change one of those weapon choices.

When you reach certain Gunslinger levels, you gain the ability to use the mastery properties of more kinds of weapons, as shown in the Weapon Mastery column of the [Gunslinger Features](#) table.

Level 2: Critical Shot

Your attack rolls with Ranged weapons can score a Critical Hit on a roll of 19 or 20 on the d20.

At Gunslinger level 9, your attack rolls with Ranged weapons score a Critical Hit on a roll of 18–20. At Gunslinger level 17, they score a Critical Hit on a roll of 17–20.

Level 2: Risk

You can perform incredible feats of daring fueled by special dice called Risk Dice.

Risk Dice. You have four Risk Dice, which are d8s. A Risk Die is expended when you use it. You regain all expended Risk Dice when you finish a Short or Long Rest. Your Risk Die changes and more Risk Dice become available as shown on the Risk Dice column of the [Gunslinger Features](#) table.

Maneuvers. You can expend Risk Dice to perform maneuvers. Your maneuver options are [detailed later](#) in the class description.

Saving Throws. If a maneuver requires a saving throw, the DC equals 8 plus your Dexterity modifier and Proficiency Bonus.

Level 3: Gunslinger Subclass

You gain a [Gunslinger subclass](#) of your choice. A subclass is a specialization that grants you features at certain Gunslinger levels. For the rest of your career, you gain each of your subclass's features that are of your Gunslinger level or lower.

Level 4: Ability Score Improvement

You gain the [Ability Score Improvement](#) feat or another feat of your choice for which you qualify. You gain this feature again at Gunslinger levels 8, 12, and 16.

Level 5: Extra Attack

You can attack twice instead of once whenever you take the [Attack](#) action on your turn.

Level 5: Gut Shot

Whenever you score a Critical Hit against a Large or smaller creature with a ranged attack using a weapon, the projectile lodges itself in the target. For 1 minute or until the target replaces one of its attacks with dislodging the projectile, its Speed is halved and it has [Disadvantage](#) on attack rolls.

Level 7: Evasion

When you're subjected to an effect that allows you to make a Dexterity saving throw to take only half damage, you instead take no damage if you succeed on the saving throw and only half damage if you fail.

You don't benefit from this feature if you have the [Incapacitated](#) condition.

Level 11: Overkill

When you deal damage with a Ranged weapon that doesn't add your ability modifier to the roll, you add your ability modifier nonetheless. If you already add your modifier to the damage roll, the target takes an extra 1d8 damage of the weapon's type.

Note that weapons that have the [Firearm](#) property don't add your ability modifier to damage rolls.

Level 13: Cheat Death

When you are reduced to 0 Hit Points and not killed outright, you can drop to 1 Hit Point instead, and you regain a number of Hit Points equal to your Gunslinger level.

Once you use this feature, you can't use it again until you finish a Short or Long Rest.

Level 15: Dire Gambit

Whenever you roll Initiative or score a Critical Hit, you regain one expended Risk Die.

Level 18: Deft Maneuver

You gain a special additional Bonus Action that you can take once on each of your turns. You can take this special Bonus Action only to use a maneuver.

Level 19: Epic Boon

You gain an [Epic Boon](#) feat or another feat of your choice for which you qualify. [Boon of Irresistible Offense](#) is recommended.

Level 20: Headshot

When you score a Critical Hit against a creature using a Ranged weapon, you can choose for it to be a Headshot. If the creature has less than 100 Hit Points, it dies. Otherwise, it takes an extra 10d10 damage of the weapon’s type.

Once you use this feature, you can’t use it again until you finish a Short or Long Rest. You can also restore your use of it by expending three Risk Dice (no action required).

Maneuver Options

The maneuvers are presented in alphabetical order.

Bite the Bullet

As a Bonus Action, you can expend one Risk Die to gain **Temporary Hit Points** equal to the number rolled on the die plus your Gunslinger level.

Blindfire

You can take a Bonus Action and expend one Risk Die to gain **Blindsight** with a range of 30 feet until the end of the current turn.

Dodge Roll

You can expend one Risk Die as a Bonus Action to move up to 15 feet and reload any Ranged weapon you are holding. This movement doesn’t provoke **Opportunity Attacks** and is unaffected by **Difficult Terrain**.

Grazing Shot

When you miss with a ranged attack roll using a weapon, you can expend one Risk Die (no action required) to deal damage to that creature equal to a roll of the die plus your Dexterity modifier (minimum of 1). This damage is the same type dealt by the weapon, and the damage can be increased only by increasing the ability modifier. You can only use this maneuver once per turn.

Maverick Spirit

When you fail an Intelligence, Wisdom, or Charisma ability check or saving throw, you can expend one Risk Die to add it to the roll, potentially turning it into a success. You can only use this maneuver once per turn.

Skin of Your Teeth

When a creature you can see hits you with an attack roll, you can take a Reaction and expend one Risk Die to dodge out of harm’s way. Roll the die and add the number rolled to your AC against this attack, potentially causing it to miss.

Gunslinger Subclasses

A Gunslinger subclass is a specialization that grants you features at certain levels, as specified in the subclass.

Gunslinger Subclasses

Name	Description
Deadeye	A precise, eagle-eyed marksman
High Roller	Gambles with their life and fortune; no risk is too high

Name	Description
Secret Agent	A covert agent with a license to kill
Spellslinger	Fires spells as well as bullets in deadly bombardments
Trick Shot	Ricochets bullets to hit targets from any angle
White Hat	A law-abiding protector of the weak that never blinks in the face of danger

Deadeye

Shoot with Bullseye Precision

A well-placed bullet is more powerful than a sword, arrow, or spell. Indeed, you believe that every violent conflict should sound like a single loud crack followed by a long silence. Such shots demand perfection, even at range, for when they are done right, they are as deadly for the target as they are stupendous for the audience.

Level 3: Eagle Eye [Maneuver]

Once per turn when you miss with a ranged attack roll, you can expend one Risk Die and add it to the attack roll, potentially causing the attack to hit.

Level 3: Sharpshooter's Stance

You have trained to fire from a stable **Prone** position, granting the following conditions.

Fire While Prone. You don't have **Disadvantage** on ranged attack rolls as a result of the Prone condition.

Quick Stand. When you have the Prone condition, you can right yourself and thereby end the condition with only 5 feet of movement.

Level 6: Concealed Position

You excel at firing from concealment, granting you the following benefits.

Camouflage. You can take the **Hide** action even if you aren't **Heavily Obscured** or behind **Three-Quarters Cover** or **Total Cover**, as long as you have the **Prone** condition. The **Invisible** condition of this Hide action ends if you don't have the Prone condition.

Sniper's Nest. If you make an attack roll while hidden and the roll misses, making the attack roll doesn't reveal your location.

Level 10: Reposition

Whenever a creature misses you with an attack roll, you can take a Reaction to end the **Prone** condition on yourself and move up to half your Speed.

Level 14: Focused Shot

When you take the **Attack** action, you can choose to make only one ranged attack roll using a weapon to make a Focused Shot. You have **Advantage** on this attack roll and, on a hit, score a Critical Hit.

High Roller

Gamble with Life and Death

Fortune is a fickle thing—unless you're a High Roller. These Gunslingers are master card sharps and dice throwers that mix their love of risk with their talent for gunplay. High Rollers push their luck until it runs out, then push harder. Why settle for a win when you could bet it all and win big?

Level 3: Poker Face

You gain proficiency with all Gaming Sets and in one of the following skills of your choice: **Deception**, **Insight**, or **Perception**.

Level 3: Liar's Dice [Maneuver]

When you make a damage roll with a Ranged weapon, you can expend one Risk Die as a Bonus Action and declare it to be a hidden roll. Roll the damage in secret and declare any total you wish. The GM has the option to call your bluff, in which case you reveal the damage dice you rolled. This has different consequences based on whether or not you lied.

The GM Calls Your Bluff; You Lied. The damage you deal is halved.

The GM Calls Your Bluff; You Told the Truth. The damage you deal is doubled.

The GM Doesn't Call Your Bluff. Use the total damage you declared, even if you rolled a different total.

Level 6: Risky Business

Once per turn when you make an attack roll against an enemy and the roll doesn't have **Disadvantage**, you can choose to make the roll with Disadvantage. When you do, you regain one expended Risk Die.

Level 10: Risk Taker

You can use your **Maverick Spirit** and **Skin of Your Teeth** maneuvers without expending a Risk Die. When you do so, roll a d6 instead of a Risk Die.

Level 14: Double or Nothing

When you score a Critical Hit using a Ranged weapon, you can gamble for a higher result. Roll a d20. If the roll is a 10 or higher, roll all of the attack's damage dice four times and add them together, instead of only two times as normal for a Critical Hit. If you roll a 9 or lower on the d20, the Critical Hit becomes a normal hit.

Secret Agent

Engage in Espionage and Assassination

Knowledge is power. The best way to defeat your enemies is by stealing what they know and replacing it with misinformation. To that end, you have been trained in the ways of covert warfare, giving you a broad range of abilities to complement your fearsome gunnery skills.

Level 3: Operative Training

Your covert training grants you the following benefits:

Concealed Shot. You learn the **Concealed Shot** cantrip. Intelligence, Wisdom, or Charisma is your spellcasting ability for this cantrip (choose when you select this subclass).

Operative Tools. You gain a **Disguise Kit** and **Thieves' Tools**, and you have proficiency with them.

Skill Proficiencies. You gain proficiency in two of these skills of your choice: **Deception**, **Investigation**, **Persuasion**, **Sleight of Hand**, or **Stealth**.

Level 3: Parting Shot [Maneuver]

When you take the **Dash**, **Disengage**, or **Dodge** action on your turn, you can expend one Risk Die to make a ranged attack using a weapon as a Bonus Action. Add the Risk Die to the damage roll on a hit.

Level 6: Fieldcraft

Your experience in the field grants you the following benefits.

Quick Change. Using a Disguise Kit, you can create a Costume and don it as a Bonus Action.

Slick Talker. Whenever you make a Charisma (**Deception**) or Charisma (**Persuasion**) check, you can treat a d20 roll of 9 or lower as a 10.

Level 10: Exit Strategy

When you take damage, you can take a Reaction to evade further harm. You have the **Invisible** condition until the start of your next turn, and you can immediately move up to 10 feet.

Once you use this feature, you can't use it again until you finish a Short or Long Rest. You can also restore your use of it by expending one Risk Die (no action required).

Level 14: License to Kill

Whenever you deal damage with a Ranged weapon, you can expend either one or two Risk Dice and add them to the damage roll. If you roll the highest number on a Risk Die, you can roll the die again and add it to the damage without expending it, rolling again if it is the highest number again, and so on. The maximum number of Risk Dice you can add to the damage equals your Proficiency Bonus.

Spellslinger

Complement Your Gunslinging with Arcana

Magic and guns aren't so different—arcane power is like gunpowder, a spell is like a bullet, and you are like a gun, directing your spells with precision at unfortunate targets. Spellslingers mix the disciplines of gunplay and spellcasting, sometimes loading arcane charges with your shots and firing bullets enhanced with lighting, frost, or flame.

Level 3: Spellcasting

You complement your bullets with the ability to cast spells.

Cantrips. You know two cantrips of your choice from the Wizard spell list (see that [class's section](#) for its list). **Fire Bolt** and **Message** are recommended. Whenever you gain a Gunslinger level, you can replace one of these cantrips with another cantrip of your choice from the Wizard spell list.

When you reach Gunslinger level 10, you learn another Wizard cantrip of your choice.

Spell Slots. The [Spellslinger Spellcasting](#) table shows how many spell slots you have to cast your level 1+ spells. You regain all expended slots when you finish a Long Rest.

Prepared Spells of Level 1+. You prepare the list of level 1+ spells that are available for you to cast with this feature. To start, choose three level 1+ from the Wizard spell list. **Chromatic Orb**, **Jump**, and **Shield** are recommended.

The number of spells on your list increases as you gain Gunslinger levels, as shown in the Prepared Spells column of the [Spellslinger Spellcasting](#) table. Whenever that number increases, choose additional spells from the Wizard spell list until the number of spells on your list matches the number on the table. The chosen spells must be of a level for which you have spell slots. For example, if you’re a level 7 Gunslinger, your list of prepared spells can include five Wizard spells of levels 1 and 2 in any combination.

Changing your Prepared Spells. Whenever you gain a Gunslinger level, you can replace one spell on your list with another Wizard spell for which you have spell slots.

Spellcasting Ability. Intelligence is your spellcasting ability for your Wizard spells.

Spellcasting Focus. You can use an **Arcane Focus** or a Ranged weapon as a Spellcasting Focus for your Wizard spells.

Spellslinger Spellcasting

—Spell Slots per Spell Level—					
Gunslinger Level	Prepared Spells	1	2	3	4
3	3	2	—	—	—
4	4	3	—	—	—
5	4	3	—	—	—
6	4	3	—	—	—
7	5	4	2	—	—
8	6	4	2	—	—
9	6	4	2	—	—
10	7	4	3	—	—
11	8	4	3	—	—
12	8	4	3	—	—
13	9	4	3	2	—
14	10	4	3	2	—
15	10	4	3	2	—
16	11	4	3	3	—
17	11	4	3	3	—
18	11	4	3	3	—
19	12	4	3	3	1
20	13	4	3	3	1

Level 3: Bang, You’re Dead!

You can use magic in place of guns.

Finger Guns. You learn the *Finger Guns* cantrip. See the [New Spells](#) section for details.

Arcane Shot. When you hit a target with a *Finger Guns* attack, you can expend one Risk Die as a Bonus Action and add it to the damage roll.

Level 6: Spellshot

When you take the **Attack** action on your turn, you can replace one of the attacks with a casting of one of your Wizard cantrips that has a casting time of an action.

Level 10: Counter-Mage

Your experience in combating spellcasters grants you the following benefits.

Abjuration-Breaker. Whenever you make a ranged attack roll, you temporarily disrupt protective magic affecting the target. For the duration of the attack, the effects of spells targeting the creature, such as **Mage Armor**, as well as the properties and powers of magic items worn or carried by the creature, are suppressed and don't function. The target of the attack can't take a Reaction to cast spells such as **Shield** in response to the attack or damage.

Antimagic Shot. When you score a Critical Hit and the target is affected by your Gut Shot feature, it also impedes the target's ability to cast spells. While the projectile is lodged in the target, it can't cast spells or take the **Magic** action. Additionally, the target has **Disadvantage** on Constitution saving throws it makes to maintain **Concentration**.

Inured to Magic. When you fail a saving throw against a spell or magical effect, you can take a Reaction to roll 1d6 and add it to the roll, potentially turning the failure into a success.

Level 14: Magic Bullet [Maneuver]

When you make a spell attack roll, you can expend one Risk Die as a Bonus Action to substitute the spell attack with a ranged attack using a weapon. Add the Risk Die to the attack roll. On a hit, the attack deals the weapon's normal damage, in addition to the effects of the spell attack roll.

Trick Shot

Ricochet Bullets from Every Angle

Accuracy means different things to different people. For you, true accuracy isn't necessarily in hitting a target on the first shot, but might include hitting the mark after the bullet bounces around a dozen times. Your attacks are just as dangerous if they miss, or even after hitting their mark, as others' are while they're still in the air.

Level 3: Creative Trajectory

You can make your projectiles travel in unexpected ways. Your ranged attacks with weapons ignore **Half Cover** and **Three-Quarters Cover**.

Level 3: Ricochet [Maneuver]

When you miss with a ranged attack using a weapon, you can take a Bonus Action and expend one Risk Die to reroll the attack and add the Risk Die to the roll. You must use the new roll.

Level 6: Fancy Gunplay

Your flashy weapon tricks grant you the following benefits.

Gun Spinning. Once per turn when you make a Charisma (**Performance**) check or a Dexterity (**Sleight of Hand**) check using one of your Ranged weapons, you can roll a Risk Die and add it to the ability check without expending it.

Speed Loader. On your turn, you can reload a weapon with the **Reload** property without taking an action or Bonus Action.

Level 10: Deft Deflection [Maneuver]

You can shoot projectiles out of the air. When an ally within 30 feet of you is hit by an attack, you can take a Reaction and expend one Risk Die to grant that ally the benefit of the [Skin of Your Teeth](#) maneuver against that attack. You must be holding a Ranged weapon to use this maneuver.

Level 14: Pinball Shot

Once on each of your turns when you hit a creature with a ranged attack using a weapon, you can deflect the projectile at additional targets. Choose a different target within 30 feet of the first and make an attack roll against it. On a hit, you can repeat this attack against a new target within 30 feet until you miss or make a total of five attacks. You can't target the same creature with more than one attack each time you use this feature.

Once you use this feature, you can't use it again until you finish a Short or Long Rest. You can also restore your use of it by expending two Risk Dice (no action required).

White Hat

Protect Your Allies and Uphold the Law

Some Gunslingers live by a code and expect others to do the same. These Gunslingers, known as White Hats, sometimes serve as officers of the law but never hesitate to do what's right when the law says otherwise. Despite their affinity for deadly weapons, White Hats prefer to keep their friends safe and subdue their enemies nonviolently—a preference their enemies don't often oblige.

Level 3: Lay Down the Law [Maneuver]

You can take a Bonus Action and expend one Risk Die to keep an eye out for dangers that threaten your companions. Choose an ally that you can see within 60 feet of you. That ally gains **Temporary Hit Points** equal to the number rolled on the Risk Die. Until the start of your next turn, if the ally is hit by an attack, you can take a Reaction to make a ranged attack using a weapon against the attacker.

Level 3: Steely-Eyed Aura

An aura of stoic confidence radiates from you in a 10-foot Emanation. You and allies within the Emanation have **Advantage** on saving throws made to avoid or end the **Frightened** condition. The aura is inactive while you have the **Incapacitated** condition.

Level 6: Reach for the Skies

When you score a Critical Hit against a creature, you call for the target to surrender instead of lodging a projectile in it. The target must succeed on a Wisdom saving throw against your Maneuver save DC or have the **Frightened** and **Incapacitated** conditions for 1 minute. These conditions end early if the creature takes any damage, if you have the Incapacitated condition, or if you die. The creature can repeat the Wisdom saving throw at the end of each of its turns, ending the conditions on itself on a success.

Level 10: Long Arm of the Law

Once per turn when you hit a Large or smaller creature with a ranged attack using a weapon, you can hobble the target. The creature can't move on its next turn unless it first takes the **Disengage** action.

Level 14: Gold Star Hero

Though gunslinging heroism, you gain the following benefits.

Improved Aura. The range of your [Steely-Eyed Aura](#) feature increases to 30 feet.

Iron-Clad Law. When you use your [Lay Down the Law](#) maneuver, the ally has **Resistance** to Bludgeoning, Piercing, and Slashing damage until the start of your next turn.

Stunned Surrender. When a creature fails its saving throw against your [Reach for the Skies](#) feature, it has the **Stunned** condition instead of the **Incapacitated** condition.

Firearms

Black powder represents a paradigm shift in the art of warfare, fueling everything from powerful siege weapons to concealable, handheld guns. In many campaign settings, firearms supplant the traditional scheme of weapons, forcing arrows, swords, and battleaxes into obsolescence. They might even be commonplace, a staple tool for hunting and defense.

Firearm Eras

Firearms have evolved dramatically throughout history, and will continue to evolve into the far future. Therefore, in addition to being organized into Simple and Martial weapons, the following firearms are organized into eras, the periods of time in which they might be encountered. Some firearms might appear in multiple eras, especially if the story demands an unusual weapon, but many are best suited to campaign settings that echo their level of technology.

The GM determines which era or eras of weapons are in the campaign.

Renaissance Firearms

Renaissance-era firearms, such as Pistols and Muskets, are weapons that have taken the first steps away from cannons and into portable rifles, making them the progenitors of all modern firearms. Weapons from this era use musket balls and loose black powder, and are therefore slow to reload. Importantly, these weapons exist comfortably in many fantasy settings alongside bows, swords, and axes, especially where pirates are at play.

Renaissance Firearms

Name	Damage	Properties	Mastery	Weight	Cost
<i>Martial Ranged Weapons</i>					
Blunderbuss	1d12 Piercing	Ammunition (Range 20/60; Shot), Heavy, Loading, Two-Handed	Scatter	15 lb.	750 GP
Musket	1d12 Piercing	Ammunition (Range 40/120; Bullet), Loading, Two-Handed	Slow	10 lb.	500 GP
Pistol	1d10 Piercing	Ammunition (Range 30/90; Bullet), Loading	Vex	3 lb.	250 GP

Industrial Age Firearms

Industrial Age firearms, such as Revolvers and Double-Barrel Shotguns, stem from advancements in machinery and assembly lines, granting them more interchangeable parts and cartridge-based bullets. These guns lack the assembly-line consistency of modern firearms, but laid down the bedrock for designs that haven't changed much since: a classic six-shot Revolver is as timeless as it is effective. While the heyday of Industrial Age firearms was in the Wild West, their simple and reliable construction means they are still commonplace in the modern day.

Industrial Age Firearms

Name	Damage	Properties	Mastery	Weight	Cost
------	--------	------------	---------	--------	------

Simple Ranged Weapons

Double-Barrel Shotgun	2d6 Piercing	Ammunition (Range 20/60; Shell), Firearm, Recoil, Reload (2), Two-Handed	Scatter	8 lb.	175 GP
Hunting Rifle	2d6 Piercing	Ammunition (Range 80/320; Bullet), Firearm, Reload (4), Two-Handed	Sighted	8 lb.	150 GP
Parlor Gun	2d4 Piercing	Ammunition (Range 30/120; Bullet), Firearm, Light, Reload (2)	Vex	1 lb.	75 GP
Revolver	2d6 Piercing	Ammunition (Range 30/120; Bullet), Firearm, Recoil, Reload (6)	Slow	3 lb.	125 GP

Martial Ranged Weapons

Cannon	2d8 Fire	Ammunition (Range 100/400; Cannonball), Firearm, Heavy, Loading, Two-Handed	Explode	225 lb.	1,500 GP
Gatling Gun	2d6 Piercing	Ammunition (Range 60/240; Bullet), Firearm, Heavy, Reload (40), Two-Handed	Automatic	125 lb.	750 GP
Magnum	2d8 Piercing	Ammunition (Range 30/120; Bullet), Firearm, Heavy, Recoil, Reload (6)	Slow	6 lb.	600 GP

Modern Firearms

Modern firearms have embraced automatic fire, ammunition magazines, and lighter caliber bullets (which can travel at much higher speeds). For these guns, form begets function: weapons are designed for a specific role, such as Sniper Rifles for long range and Pump Shotguns for close quarters. Moreover, weapons that enjoyed success in the Wild West, such as the Double-Barrel Shotgun, can still be found in use today.

Modern Firearms

Name	Damage	Properties	Mastery	Weight	Cost
------	--------	------------	---------	--------	------

Simple Ranged Weapons

Flare Gun	2d6 Fire	Ammunition (Range 30/120; Flare), Firearm, Loading	Slow	1 lb.	100 GP
Handgun	2d4 Piercing	Ammunition (Range 30/120; Bullet), Firearm, Light, Reload (10)	Vex	3 lb.	125 GP

Martial Ranged Weapons

Assault Rifle	2d6 Piercing	Ammunition (Range 80/320; Bullet), Firearm, Reload (20), Two-Handed	Automatic	7 lb.	300 GP
Pump Shotgun	2d8 Piercing	Ammunition (Range 20/60; Shell), Firearm, Heavy, Recoil, Reload (8), Two-Handed	Scatter	7 lb.	550 GP
Sniper Rifle	2d8 Piercing	Ammunition (Range 100/400; Bullet), Firearm, Heavy, Loading, Two-Handed	Sighted	8 lb.	450 GP
Submachine Gun	2d4 Piercing	Ammunition (20/60; Bullet), Firearm, Light, Reload (16)	Automatic	6 lb.	250 GP

Weapon Properties

Here are definitions of the properties in the Properties column of the Firearm tables. New properties are marked with an asterisk (*).

Ammunition

You can use a weapon that has the Ammunition property to make a ranged attack only if you have ammunition to fire from it. The type of ammunition required is specified with the weapon's range. Each attack expends one piece of ammunition. Drawing the ammunition is part of the attack (you need a free hand to load a one-handed weapon). After a fight, you can spend 1 minute to recover half the ammunition (round down) you used in the fight; the rest is lost.

Finesse

When making an attack with a Finesse weapon, use your choice of your Strength or Dexterity modifier for the attack and damage rolls. You must use the same modifier for both rolls.

Firearm*

You don't add your ability modifier to the weapon's damage, unless otherwise stated. Firearm ammunition is destroyed upon use.

Heavy

You have **Disadvantage** on attack rolls with a Heavy weapon if it's a Melee weapon and your Strength score isn't at least 13 or if it's a Ranged weapon and your Dexterity score isn't at least 13.

Light

When you take the **Attack** action on your turn and attack with a Light weapon, you can make one extra attack as a Bonus Action later on the same turn. That extra attack must be made with a different Light weapon, and you don't add your ability modifier to the extra attack's damage unless that modifier is negative.

Range

A Range weapon has a range in parentheses after the Ammunition or Thrown property. The range lists two numbers. The first is the weapon's normal range in feet, and the second is the weapon's long range. When attacking a target beyond normal range, you have **Disadvantage** on the attack roll. You can't attack a target beyond the long range.

Recoil*

After you make an attack with this weapon, you can't make ranged attacks beyond the weapon's normal range until the end of the current turn.

Reload

This weapon can be used to make a number of attacks before it must be reloaded. If you are proficient with the weapon, reloading it takes an Action or a Bonus Action; otherwise, reloading it takes an Action.

Two-Handed

A Two-Handed weapon requires two hands when you attack with it.

Mastery Properties

Each weapon has a mastery property, which is usable only by a character who has a feature, such as Weapon Mastery, that unlocks the property for the character. The properties used in this book are defined below. New mastery properties are marked with an asterisk (*).

Automatic*

When you make an attack with this weapon, you can choose to make two attacks instead. These attacks are always made with **Disadvantage**, regardless of circumstance. You can't replace these attacks. If this weapon has the **Ammunition** property, these attacks use twice the normal amount of ammunition.

Explode*

When you take the **Attack** action, you can replace one of your attacks with an explosion from this weapon's projectile. This explosion is a 5-foot-radius **Sphere** centered on a point you choose within the weapon's normal range. Each creature within the Sphere makes a Dexterity saving throw (DC 8 plus your Strength or Dexterity modifier and your Proficiency Bonus). On a failed save, a creature takes the weapon's damage, but don't add your ability modifier to that damage unless that modifier is negative. On a successful save, a creature takes half as much damage. You can create an explosion only once per turn.

Push

If you hit a creature with this weapon, you can push the creature up to 10 feet straight away from yourself if it is Large or smaller.

Sap

If you hit a creature with this weapon, that creature has **Disadvantage** on its next attack roll before the start of your next turn.

Scatter*

Being within 5 feet of an enemy doesn't impose **Disadvantage** on your ranged attack rolls with this weapon.

Sighted*

Attacking at long range with this weapon doesn't impose **Disadvantage** on your attack rolls. When you hit a creature with an attack using this weapon at long range, you can reroll any of the damage dice and must use the new roll.

Slow

If you hit a creature with this weapon and deal damage to it, you can reduce its Speed by 10 feet until the start of your next turn. If the creature is hit more than once by weapons that have this property, the Speed reduction doesn't exceed 10 feet.

Vex

If you hit a creature with this weapon and deal damage to the creature, you have **Advantage** on your next attack roll against that creature before the end of your next turn.

Weapon Descriptions

Weapons on the [Firearm tables](#) are detailed above.

Assault Rifle. Combining a high rate of fire with rifle-grade ballistics, the Assault Rifle is a staple weapon for all modern militaries. Dozens of variants exist on this general design, but all share the traits of a flexible and formidable weapon.

Blunderbuss. This distinctive short-range firearm features a dramatically flared muzzle designed to launch shot in a wide spray. Most effective at close range, the Blunderbuss can be considered a precursor to the modern shotgun.

Cannon. Smoothbore, muzzleloading Cannons are common fixtures on pirate ships and defensive fortifications, capable of splintering wood and reducing stone to gravel with a thunderous boom. Larger siege weapons of this type exist, and require entire teams of operators to position, load, and fire.

Double-Barrel Shotgun. A classic design with two loaded barrels, the Double-Barrel Shotgun trades ammo capacity and range for reliability and firepower.

Flare Gun. Less a firearm and more a survival tool, a Flare Gun fires a single white-hot flare, useful for distress signals and last-ditch-effort self defense.

Gatling Gun. Infamous for its rate of fire, the Gatling Gun rotates and fires six or more barrels in succession. This weapon is cumbersome, easily recognizable, and utterly terrifying.

Handgun. Portable, reliable, and with a generous magazine size, the Handgun is the go-to firearm for self-defense and law enforcement.

Hunting Rifle. Designed for big game, Hunting Rifles are slow but accurate, requiring bolt action operation between every shot.

Magnum. Chambered for large-caliber bullets, Magnum revolvers pack the most kick possible into a single shot.

Parlor Gun. The smallest usable firearm, a Parlor Gun can be tucked into a stocking or hidden down a sleeve for two barrels of point-blank fire.

Pistol. The earliest type of one-handed firearm, a Pistol operates as a miniature Musket, loading and firing a single heavy projectile with deadly results.

Pump Shotgun. The Pump Shotgun's namesake is a distinctive sliding grip on the barrel which can be "pumped" to chamber a new round.

Revolver. An iconic handgun, the Revolver stores six bullets in a rotating cylinder. This weapon is favored by Gunslingers for its reliability and stopping-power.

Sniper Rifle. An instrument of ranged precision, the Sniper Rifle can take shots from distant, nearly invisible ranges.

Submachine Gun. Firing lighter, easier to control rounds, the Submachine Gun is an effective alternative to larger automatic weapons.

Firearm Ammunition

Ammunition is required by a weapon that has the Ammunition property. A weapon’s description specifies the type of ammunition used by the weapon. The following Ammunition table lists new types of ammunition used by firearms and the amount you get when you buy them.

Firearm ammunition is destroyed upon use.

Type	Amount	Weight	Cost
Bullets	10	1 ½ lb.	3 GP
Cannonballs	5	10 lb.	25 GP
Flares	5	5 lb.	5 GP
Shells	10	1 ½ lb.	5 GP
Shot	10	2 lb.	1 GP

New Feats

This section offers a collection of new feats, which are special features not tied to a character class. A feat represents a talent or an area of expertise that gives a character special capabilities. It embodies training, experience, and abilities beyond what a class provides.

By whatever means you acquire a feat, you can take it only once unless its description says otherwise.

Iron Hero

General Feat (Prerequisite: Level 4+)

You gain the following benefits.

Ability Score Increase. Increase your Strength or Dexterity score by 1, to a maximum of 20.

Underdog’s Resolve. When you are attacked by a creature that has a CR higher than your character level, you gain a +2 bonus to your Armor Class for that attack.

Vengeful Strike. You have **Advantage** on attack rolls against any creature that has reduced one of your allies to 0 Hit Points since the end of your last turn.

Heroic Intervention. When an enemy you can see takes a Legendary Action, you can take a Reaction to intercede, preventing the Legendary Action from happening. You can take this Reaction a number of times equal to your Proficiency Bonus and regain all expended uses when you finish a Short or Long Rest.

Marksman’s Luck

General Feat (Prerequisite: Level 4+, Dexterity 13+)

You gain the following benefits.

Ability Score Increase. Increase your Dexterity score by 1, to a maximum of 20.

Flip Die. Once per turn, when you roll for damage with a Ranged weapon, you can flip one of the damage dice over and use the number on the bottom. You can't use this ability on d4s. Note that for a balanced die, the top and bottom numbers add up to one more than the die's largest number.

Enhanced Critical. When you score a Critical Hit with a Ranged weapon, the target's Speed is 0 until the end of its next turn.

Gun-Mage Adept

General Feat (Prerequisites: Level 4+, Spellcasting or Pact Magic Feature)

You gain the following benefits.

Ability Score Increase. Increase your Dexterity by 1, to a maximum of 20.

Ranged Weapon Proficiency. You gain proficiency with Ranged Martial weapons.

Cantrip. You learn the **Finger Guns** cantrip.

Expanded Spell List. The following spells are added to your spell list: **Antiballistics Field**, **Ballistic Smite**, **Conjure Cannonball**, **Conjure Cover**, **Jam Weapon**, **Jethro's Instant Reload**, and **Perforating Shot**.

Spells Prepared. Choose a number of spells equal to your Proficiency Bonus from among those in the Expanded Spell List benefit. You always have these spells prepared. Whenever you gain a new level, you can replace one of these spells with a different spell from the Expanded Spell List.

New Spells

This section contains the descriptions of spells that are new and available to all classes.

Spell Descriptions

New spells are presented in alphabetical order.

Antiballistics Field

Level 6 Abjuration (Cleric, Wizard)

Casting Time: Action

Range: Self

Components: V, S, M (a pinch of wet gunpowder)

Duration: **Concentration**, up to 10 minutes

A 40-foot **Emanation** extends from you, disrupting projectiles and causing Ranged weapons to malfunction. Within the Emanation, whenever a Ranged weapon is used for an attack, the weapon immediately malfunctions and the attack is lost. A malfunctioning weapon can't be used to make an attack until a creature takes the **Utilize** action to fix the weapon malfunction. Ranged attacks using weapons whose projectiles pass through the Emanation have **Disadvantage** and deal only half damage on a hit.

Ballistic Smite

Level 1 Evocation (Paladin)

Casting Time: Bonus Action, which you take immediately after hitting a creature with a Ranged weapon

Range: Self

Components: V

Duration: Instantaneous

Choose Acid, Cold, Fire, Lightning, Poison, or Thunder damage. The target hit by the attack takes an extra 2d6 damage of the chosen type. The triggering attack can deal the chosen damage type or its normal damage type (your choice).

Using a Higher-Level Spell Slot. The damage increases by 1d6 for each spell slot level above 1.

Concealed Shot

Illusion Cantrip (Bard, Druid, Sorcerer, Warlock, Wizard)

Casting Time: Action

Range: Touch

Components: S, M (a Ranged weapon)

Duration: 1 minute

A Ranged weapon you touch is made supernaturally subtle. For the duration, when you make a ranged attack using the weapon, the weapon or ammunition you're using becomes **invisible** while in flight and the weapon becomes silent. If the weapon produces smoke or light, the spell suppresses these effects. The weapon or projectile you're using becomes visible again after the attack hits or misses. If you are hidden and the target is 80 feet or further from you, the attack doesn't reveal your location.

Conjure Cannonball

Level 3 Conjuration (Sorcerer, Wizard)

Casting Time: Action

Range: 600 feet

Components: V, S, M (a small replica cannon)

Duration: Instantaneous

You summon a cannonball, mid-flight and at full velocity, which explodes on impact. Make a ranged spell attack roll against a target you can see within range. On a hit, the target takes 5d10 Bludgeoning damage and an explosion extends from it in a 5-foot **Emanation**. Each creature other than the target within the Emanation makes a Dexterity saving throw, taking half as much damage as the target on a failed save.

Using a Higher-Level Spell Slot. The damage increases by 1d10 for each slot level above 3.

Conjure Cover

Level 1 Conjuration (Druid, Paladin, Sorcerer, Wizard)

Casting Time: Bonus Action

Range: 10 feet

Components: V, S, M (a duck figurine)

Duration: **Concentration**, up to 1 hour

You conjure a low cobblestone wall along the ground at a point you can see within range. The wall is 18 inches thick and is composed of three 5-foot-long, 3-foot-high segments. Each segment must be contiguous with at least one other segment.

A Medium creature that hunkers behind the wall has **Half Cover**, and a Small creature that hunkers behind it has **Three-Quarters Cover**. The wall can be leapt over without spending any additional movement.

Each segment has AC 10 and 30 hit points. Reducing a segment of the wall to 0 hit points causes it to crumble, destroying it. The wall disappears when all the segments are destroyed or the spell ends.

Finger Guns

Evocation Cantrip (Bard, Sorcerer, Wizard)

Casting Time: Bonus Action

Range: Self

Components: V, S

Duration: 1 minute

You extend your forefinger and thumb, a dangerous gesture mimicking a gun. For the duration, your hand counts as a Simple Ranged weapon with a range of 60/240 feet and the **Slow** mastery property. You can use your spellcasting ability instead of Dexterity for the attack rolls of this weapon. On a hit, the weapon deals 2d6 Force damage and doesn't add your ability modifier to damage.

Cantrip Upgrade. The weapon's normal range increases by 30 feet and its long range increases by 120 feet when you reach levels 5 (90/360 feet), 11 (120/480 feet), and 17 (150/600 feet).

Jam Weapon

Level 2 Transmutation (Bard, Wizard)

Casting Time: Reaction, which you take when a creature you can see within range makes an attack using a Ranged weapon

Range: 60 feet

Components: V, S, M (a pinch of wet gunpowder)

Duration: Instantaneous

The weapon you target suffers a malfunction and the attack fails. A malfunctioning weapon can't be used to make an attack until a creature takes the **Utilize** action to fix the weapon malfunction.

Jethro's Instant Reload

Level 2 Conjuration (Bard, Ranger, Wizard)

Casting Time: Action

Range: Touch

Components: V, S, M (a spent bullet casing)

Duration: 8 hours

One Ranged weapon you touch becomes enchanted to reload itself automatically. If the weapon has the **Loading** or **Reload** property, you ignore the property for the duration. When the weapon's ammunition is depleted, ammunition you are carrying teleports into the weapon.

Perforating Shot

Level 1 Evocation (Paladin, Ranger)

Casting Time: Bonus Action, which you take immediately after hitting or missing with a ranged attack using a weapon

Range: Self

Components: V

Duration: Instantaneous

As your attack hits or misses the target, the weapon or ammunition transforms into a 5-foot-wide **Line** of magical energy that extends out to the weapon's normal range. The Line includes the attack's original target. Each creature within the Line makes a Dexterity saving throw, taking Force damage equal to the weapon's damage.

the weapon's normal damage on a failed save or half as much damage on a successful one.

Using a Higher-Level Spell Slot. The weapon's damage increases by 1d8 for each slot level above 1.
